The Psychology of Abusive/Predatory Relationships: How to

Predators are masters at building relationships. Their biggest problem is not getting the child, it's getting rid of the child when they become too old for them and their interest in them wanes. The 'secret.'. As already mentioned recurrent abusers rarely hurt the child as that would encourage disclosure.

How Victims are groomed by Abusive Predators

Abusive people thrive under only one circumstance: when they have control over another. The predatory person will do anything to maintain complete autonomy over another person's decisions,

The Psychology of Abusive/Predatory Relationships: How to

The ability to go undetected and unlabeled is perhaps the most dangerous aspect of predatory behavior. By contrast, individuals who are outwardly abusive, intolerant, or condescending are easily

The Psychology of Abusive/Predatory Relationships: How to

Background. The incidence of child sexual abuse is usually based on retrospective recall by adults in studies mostly emanating from the USA (Reference Smith, Bentovim, Rutter, Taylor and Hersov Smith & Bentovim, 1994). Estimates of prevalence are bedevilled by differences of definition and methods of study and are closely tied

The Psychology of Abusive/Predatory Relationships: How to

Sexual Predators, Abuse of Power and Silence. 08 July, 2018.
Sexual predators aren't sick. They aren't sex addicts, nor do they live only in the highest echelons of Hollywood. The brain of a sexual predator can hold its own in any common scenario. And, above all, they abuse their position of power to subdue their victims, always expecting the complicity of a social system accustomed to looking the other way.
